November 2021

The IAHR Ecohydraulics Committee and the local organizing committee organize the 14th International Symposium on Ecohydraulics (ISE 2022) that will be held on October 10-14, 2022 in Nanjing, China. Ecohydraulics is a rapidly developing inter-discipline of ecology and hydraulics brought about by the ever-growing concern of aquatic and riparian ecology. Launched in 1994, the International Symposia on Ecohydraulics aim to provide a platform for scientists and engineers worldwide to discuss cutting-edge scientific progress, compare and evaluate state-of-the-art technical methods, and recommend them to the end-users. The symposiumÂ will have six keynote sessions and 40 general sessions under the themes of "Ecohydraulics in Practice" and "Fundamentals of Ecohydraulics". There will be another 10 special sessions.Â

Submit your abstract before January 15, 2022.
