# Hydraulic engineering

Dossier de<br /> la rÃ©daction de H2o
September 2024

This cross-journal Collection aims to explore the hydraulic problems faced in both fundamental and applied research, with direct relevance for the optimal planning, design and operation of water resource systems. The collection features articles that cover, for example, hydraulic structures, erosion protection, flood protection, hydroelectric-power generation, and more.

Submission deadlineÂ - 31 October 2024
