# IWA Aspire Conference

Dossier de<br /> la rÃ©daction de H2o
January 2023

The 5-day conference and exhibition will feature keynote addresses by world-renowned water technology experts from both academia and industry, who will share, discuss, and dissect significant latest developments and scientific advancements related to various water issues. Water professionals are invited to submit and present their latest findings in parallel sessions centred on specific themes related to broad areas of one water management strategies. The call for papers is closing on 18 February 2023.
